If you have the certificate, you can enjoy many advantages: you can enter **C-S4CFI-2402 New Test Materials** a big enterprise and double your salary and buy things you want. It must be equipped with more perfect quality to lead greater pass rate.

You can check out the interface, question quality [C-S4CFI-2402](#) and usability of our practice exams before you decide to buy. It is better to find a useful and valid C-S4CFI-2402 training torrent rather than some useless study material which will waste your money and time.

One-year free renewal.

**NEW QUESTION: 1A. Option B B. Option D C. Option C D. Option A** **Answer: D** **Explanation:**

Reference:

<http://www.boyter.org/wp-content/uploads/2014/12/Backup-And-Recovery-Approaches-Using-Aws.pdf>

**NEW QUESTION: 2** Your customer has domains with a specific region and locations with one specific domain. What type of structure do you use to associate these objects? **Note:** There are 1 correct answers to this question. **A. Non-hierarchical B. Hierarchical C. Mixed D. Dependent**

**Answer: D**

**NEW QUESTION: 3**

各ドロップダウンリストから適切な攻撃を選択して、対応する図解された攻撃にラベルを付けます。

手順：攻撃は1回しか使用できず、選択するとドロップダウンリストから消えます。シミュレーションが完了したら、[完了]ボタンを選択して送信してください。 **Answer:** **Explanation:**

**Explanation:** 1: Spear phishing is an e-mail spoofing fraud attempt that targets a specific organization, seeking unauthorized access to confidential data. As with the e-mail messages used in regular phishing expeditions, spear phishing messages appear to come from a trusted source. Phishing messages usually appear to come from a large and well-known company or Web site with a broad membership base, such as eBay or PayPal. In the case of spear phishing, however, the apparent source of the e-mail is likely to be an individual within the recipient's own company and generally someone in a position of authority. 2: The Hoax in this question is designed to make people believe that the fake AV (anti-virus) software is genuine. 3: Vishing is the act of using the telephone in an attempt to scam the user into surrendering private information that will be used for identity theft. The scammer usually pretends to be a legitimate business, and fools the victim into thinking he or she will profit. 4: Phishing is the act of sending an email to a user falsely claiming to be an established legitimate enterprise in an

attempt to scam the user into surrendering private information that will be used for identity theft. Phishing email will direct the user to visit a website where they are asked to update personal information, such as a password, credit card, social security, or bank account numbers, that the legitimate organization already has. The website, however, is bogus and set up only to steal the information the user enters on the page.5: Similar in nature to e-mail phishing, pharming seeks to obtain personal or private (usually financial related) information through domain spoofing. Rather than being spammed with malicious and mischievous e-mail requests for you to visit spoof Web sites which appear legitimate, pharming 'poisons' a DNS server by infusing false information into the DNS server, resulting in a user's request being redirected elsewhere. Your browser, however will show you are at the correct Web site, which makes pharming a bit more serious and more difficult to detect. Phishing attempts to scam people one at a time with an e-mail while pharming allows the scammers to target large groups of people at one time through domain spoofing. References:
