Explanation: Explanation/Reference: Sorry this question series is one the most annoying ones, i have ever had in an exam. Just my feelings, that the correct answers aren't the answers Microsoft want to hear. For this one there shouldn't be any doubt, that the SCCM Server (Server 3) needs the Exchange connector. Why? Because the mobile devices aren't specified. To include all Active Sync Devices (Android, Symbian...) you need Exchange. Install an enrollment proxy point on Server6 could be a correct answer, too.
