Explanation:In Windows Server 2012 R2, you can use Server Manager to perform management tasks on remote servers. Remote management is enabled by default on servers that are running Windows Server 2012 R2. To manage a server remotely by using Server Manager, you add the server to the Server Manager server pool. You can use Server Manager to manage remote servers that are running Windows Server 2008 and Windows Server 2008 R2, but the following updates are required to fully manage these older operating systems. Windows Management Framework 3.0 To use this release of Server Manager to access and manage remote servers that are running Windows Server 2008 or Windows Server 2008 R2, you must first install .NET Framework 4.0, and then install Windows Management Framework 3.0 on those servers.
