We care about our reputation and make sure all customers can pass exam, The only way to stand out beyond the average with advantages is being competent enough, We are confident that you will be attracted to our C-THR87-2405 guide question.

NEW QUESTION: 1 Refer to the exhibit. Assume that all shown agents are available to take a call. Which agent will receive the call when a select resource step is triggered in the script for the Customer Service CSQ?
A. s1dispatch-OH
B. the agent with the shortest handled time
C. the agent that has been idle the longest
D. s1dispatch-PA
Answer: D
Explanation: Explanation The Contact Service Queue (CSQ) controls incoming calls by determining where an incoming call should be placed in the queue and to which agent the call is sent. After you assign an agent to a resource group and assign skills, you need to configure the CSQs. You assign agents to a CSQ by associating a resource group or by associating all skills of a particular CSQ. Agents in the selected resource group or who have all the selected skills are assigned to the CSQ. Skills within the CSQ can be ordered. This means, when resources are selected, a comparison is done based on the competency level (highest for "most skilled" and lowest for "least skilled") of the first skill in the list. If there is a "tie" the next skill within the order is used, and so on. Reference: http://www.cisco.com/c/en/us/td/docs/voice_ip_comm/cust_contact/contact_center/crs/express_10_0/configurati

NEW QUESTION: 2 Which are two valid scenarios related to vRealize Automation Extensibility Lifecycles? (Choose two.)
