Windows Explorer, copy the PolicyDefinitions folder to the NETLOGON share.**D.** From Server Manager, add the Group Policy Management feature**Answer: A**Explanation:A. Create Disk Storage PoolB. PolicyDefinitions folder in SYSVOLC. Group Policy Management is a console for GPO MgmtD. Folder is for logon scriptsPolicyDefinitions folder within the SYSVOL folder hierarchy. By placing the ADMX files in this directory, they are replicated to every DC in the domain; by extension, the ADMX-aware Group Policy Management Console in Windows Vista, Windows 7, Windows Server 2008 and R2 can check this folder as an additional source of ADMX files, and will report them accordingly when setting your policies.By default, the folder is not created. Whether you are a single DC or several thousand, I would strongly recommend you create a Central Store and start using it for all your ADMX file storage. It really does work well. The Central Store To take advantage of the benefits of .admx files, you must create a Central Store in the SYSVOL folder on a domain controller. The Central Store is a file location that is checked by the Group Policy tools. The Group Policy tools use any .admx files that are in the Central Store. The files that are in the Central Store are later replicated to all domain controllers in the domain.To create a Central Store for .admx and .adml files, create a folder that is named PolicyDefinitions in the following location: \FQDNSYSVOL\FQDNpoliciesNote: FQDN is a fully qualified domain name.<http://tiger.matt.wordpress.com/tag/policydefinitions/>
