Green Associate Exam Exam Paper Pdf

These fabulous and fantastic tools are going to support [LEED-Green-Associate](#) and guide you greatly in your study and you will be happy with the great result All the things can be carried out greatly for you in the USGBC LEED-Green-Associate audio training when you completely rely on the latest USGBC LEED Green Associate Exam.

Accompanied with their help, the effectiveness of our LEED-Green-Associate pass-for-sure braindumps: LEED Green Associate Exam are boosting greatly, By far, our USGBC exam braindumps are the industries finest.

We provide our clients with professional and accurate learning [HPE7-A02 Exam Paper Pdf](#) materials, The experts have analyzed the spectrum of the exam questions for so many years and sort out the most useful knowledge edited into the LEED-Green-Associate dumps torrent: LEED Green Associate Exam for you, so you will not confused by which is necessary to remember or what is the question items that often being tested.

Not only is our USGBC LEED LEED-Green-Associate study material the best you can find, it is also the most detailed and the most updated, If you cannot move forward and just stand still, you will never be thought highly by your bosses (LEED-Green-Associate test simulator).

So it will not wrong to say that, USGBC LEED-Green-Associate Exam Dumps is the best study material for preparation of your exam, The best exam questions and answers for USGBC LEED Green Associate Exam exams are here.

With our LEED-Green-Associate study materials, all your problems will be solved easily without doubt, If you have any questions related to our LEED-Green-Associate New Braindumps Free exam prep, pose them and our employees will help you as soon as possible.

NEW QUESTION: 1You have a server named Server1 that runs Windows Server 2012 R2. Server1 has the Hyper-V server role installed. On Server1, you create a virtual machine named VM1. VM1 has a legacy network adapter. You need to assign a specific amount of available network bandwidth to VM1. What should you do first?
A. Add a second legacy network adapter, and then configure network adapter teaming.
B. Remove the legacy network adapter, and then add a network adapter.
C. Remove the legacy network adapter, and then run the Set-VMNetworkAdaptercmdlet.
D. Add a second legacy network adapter, and then run the Set-VMNetworkAdaptercmdlet.
Answer: B
Explanation: Explanation/Reference: Explanation
The legacy adapter doesn't support bandwidth management (check screenshots below). and if we remove the legacy network adapter without adding a new one, what would we set with Set-VMNetworkAdapter? so the complete answer should be "Remove the legacy network adapter, then add a network adapter, and then run the Set-VMNetworkAdapter cmdlet" but we're asked for what we should do FIRST. (You'll see in the next screenshot that for a "Network adapter, bandwidth is managed here) <http://technet.microsoft.com/en-us/library/hh848457.aspx> Set-VMNetworkAdapter Configures features of the virtual network adapter in a virtual machine or the management operating system. [...] -MaximumBandwidth<Int64> Specifies the maximum bandwidth, in bits per second, for the virtual network adapter. The specified value is rounded to the nearest multiple of eight. Specify zero to disable the feature. Bandwidth management
Bandwidth management is a new feature in Windows Server 2012 R2 Hyper-V that enables you to set both a minimum and maximum Mbps of throughput for any virtual network adapter. In Windows Server 2008 R2, you could configure a maximum bandwidth but not a minimum. Now you can configure both a minimum and a maximum for each virtual network adapter. You enable and configure bandwidth management on a virtual network adapter in the settings of a VM, as shown in

Figure3-12. For either the Minimum Bandwidth or Maximum Bandwidth setting, configuring a value of 0 leaves that setting unrestricted. You can also use the Set-VMNetworkAdapter to configure minimum and maximum bandwidth on a virtual network adapter. As an alternative to specifying a value for Mbps, you can use this cmdlet to specify a relative bandwidth weight between 0 and 100 relative to other virtual network adapters. To ensure that all virtual network adapters are given an equal minimum or maximum bandwidth, you can assign the same bandwidth weight to all adapters.

NEW QUESTION: 2

別のネットワーク上にある宛先ホストのアドレスを含むのはどのOSI層ヘッダーですか？**A.**

セッション**B.** データリンク**C.** ネットワーク**D.** 申し込み**E.** 体格**F.** 輸送**Answer: C** Explanation:

説明/参照：Explanation:

この情報を含むのはネットワークアドレスだけです。パケットを送信するために、送信者はネットワークアドレスとデータリンクアドレスを使用します。しかし、レイヤ2アドレスは、送信者に向かう途中のネクストホップデバイスのアドレスだけを表します。各ホップで変更されます。ネットワークアドレスは変わりません。

NEW QUESTION: 3 What happens if a workaround becomes the permanent way of dealing with a problem that cannot be resolved cost-effectively? **A.** A change request is submitted to change control **B.** Problem management restores the service as soon as possible **C.** The problem record is deleted **D.** The problem remains in the known error status **Answer: D**

NEW QUESTION: 4 A cloud service can exist as a: Select the correct answer. **A.** software program remotely communicating with a software program on a server using a proprietary protocol **B.** All of the above. **C.** Web service accessed via HTTP **D.** REST service accessed via HTTP **Answer: B**
