NEW QUESTION: 1 Given: ABC University is deploying a WLAN across 30 campus buildings to provide wireless network and Internet access to 15,000 college students. ABC's security policy mandates physical security of infrastructure network devices. What would be the most effective steps for upholding ABC's physical security requirements throughout their network? (Choose two) **A.** Install access points in lockable ceiling-mount enclosures. **B.** Enable security and configure strong passwords for HTTP management on the APs. **C.** Use proprietary PoE powered access points to prevent unauthorized use in case of theft. **D.** Always mount APs in redundant pairs as a precaution against tampering. **E.** Use access points with non-removable antennas to prevent antenna theft. **Answer: A, E** Explanation: Many non-metal lockable enclosures are available from the manufacturers and other vendors. Many lockable enclosures include antenna mounts for better signal reception. Several vendors sell APs with built-in or non-removable antennas, which could be used with lockable enclosures to prevent theft.

NEW QUESTION: 2 **A.** Option **A**. **B.** Option **B**. **C.** Option **C**. **D.** Option **D** **Answer: C** Explanation: Installation Manager creates log files that you can use to troubleshoot any installation problems. Consider verifying the log files after any installation to ensure that everything in that process went successfully. To examine the logs manually, locate the Installation Manager logs directory. The default location for this directory varies according to the operating system: Windows: C:\ProgramData\IBM\Installation Manager\logs UNIX: /var/ibm/InstallationManager/logs References:
