**A.** Conduct an internal audit against industry best practices to perform a qualitative analysis.

**Answer: D**  
**Explanation:** Security posture refers to the overall security plan from planning through to implementation and comprises technical and non-technical policies, procedures and controls to protect from both internal and external threats. From a security standpoint, one of the first questions that must be answered in improving the overall security posture of an organization is to identify where data resides. All the advances that were made by technology make this very difficult. The best way then to improve your company's security posture is to first survey threat feeds from services inside the same industry.
