NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. The domain contains four servers on a test network. The servers are configured as shown in the following table. Server1 uses the storage shown in the following table. You perform the following tasks: On Server2, you create an advanced SMB share named Share2A and an applications SMB share named Share2B. On Server3, you create an advanced SMB share named Share3. On Server4, you create an applications SMB share named Share4. You add Server3 and Server4 to a new failover cluster named Clus1. On Clus1, you configure the File Server for general use role, you create a quick SMB share named Share5A, and then you create an applications SMB share named Share5B. You plan to create a failover cluster of two virtual machines hosted on Server1. The clustered virtual machines will use shared .vhdx files. You need to recommend a location to store the shared .vhdx files. Where should you recommend placing the virtual hard disk (VHD)? **A. \Server4Share4 B. \Server3Share3 C. \Clus1Share5B D. \Server2Share2B** **Answer: C**

NEW QUESTION: 2Review the following requirement: A home loan application has a new requirement to track changes to the following properties during the lifecycle of the loan process (which can be many weeks and allows for updates to these properties at different points throughout the process). Properties to Track: Loan Amount Home Value Downpayment The new requirement is to track all changes to these properties and send the previous value, current value and operator who made the change to a web service used for fraud detection. A second requirement is to spin-off a loan review process if the loan amount changes by more than 20%. This review process occurs in parallel to the primary process. Given the above requirements which of the following approaches is most appropriate? (Choose One) **A. Use a declare on-change rule to track all of the properties and execute the web services. Also utilize the process override functionality, in conjunction with a when rule to check for the 20% change, to execute the review process B. Use the property auditing landing page and its configuration options to track the property changes and call the appropriate web service. Also,**

create an additional declare on-change rule to check for the 20% change and start the review process
C. Use a declare on-change rule to look for changes in the 3 properties and then execute the appropriate web service. Use a separate trigger to track the change in loan amount and start the review process flow if the change is more than 20%
D. Use a declare trigger to check for changes to the properties and copy the previous values to 3 additional properties. In the activity called by the trigger execute the web services and determine, using a when rule, if the 20% change has occurred, if so execute the review flow
Answer: D

NEW QUESTION: 3
Answer: Explanation: See solution below.
Explanation: We should create an Azure file share.
Step 1: In the Azure portal, select All services. In the list of resources, type Storage Accounts. As you begin typing, the list filters based on your input. Select Storage Accounts. On the Storage Accounts window that appears.
Step 2: Locate the rg1lod7523691n1 storage account.
Step 3: On the storage account page, in the Services section, select Files.
Step 4: On the menu at the top of the File service page, click + File share. The New file share page drops down.
Step 5: In Name type myshare. Click OK to create the Azure file share.
