Our C_ARCIG_2404 study tool can help you pass the exam.

NEW QUESTION: 1 Drag and Drop Question Drag the solution on the left to the appropriate business requirement on the right, such that the solution solves the requirement. **Answer:** Explanation:

NEW QUESTION: 2 You need to maximize performance of video delivery. Which code segment should you use as the body of the GetVideoStream function in the videoController class? **A.** Option C **B.** Option A **C.** Option D **D.** Option B **Answer: B**

NEW QUESTION: 3 What is the default session distribution policy in the PA-7000 Series? **A.** Ingress-Slot **B.** Round Robin **C.** Egress-Slot **D.** Hash **Answer: A** Explanation: Explanation (PA-7000 Series firewalls only) New sessions are assigned to a DP on the same NPC on which the first packet of the session arrived. The selection of the DP is based on the session-load algorithm but, in this case, sessions are limited to the DPs on the ingress NPC. Depending on the traffic and network topology, this policy generally decreases the odds that traffic will need to traverse the switch fabric. Use this policy to reduce latency if both ingress and egress are on the same NPC. If the firewall has a mix of NPCs (PA-7000 20G and PA-7000 20GXM for example), this policy can isolate the increased capacity to the corresponding NPCs and help to isolate the impact of NPC failures.

NEW QUESTION: 4 DRAG DROP **Answer:** Explanation:
