NEW QUESTION: 1When an external program triggers a background processing event, which operating system executable of the SAP system is used in triggering the event?**A.** sapevent_launcher**B.** rfc**C.** sapevt**Answer: C**

NEW QUESTION: 2Which of the following is an assumption of technical analysis?**A.** Securities prices move in identifiable trends.**B.** Changes in the market value of any good are determined solely by supply and demand fluctuations.**C.** Securities markets are weak-form inefficient.**D.** Supply and demand is governed by both rational and irrational factors.**E.** All of these choices are assumptions of technical analysis.**Answer: E****Explanation:**Explanation/Reference:
Explanation:Technical analysis is primarily grounded on three major assumptions - (1.) the market value of any good is determined solely by supply and demand, (2.) supply and demand fluctuations are caused by both rational and irrational factors, and (3.) the prices of individual securities and securities markets move in trends, i.e.securities markets "price-in" information slowly. The third assumption of technical analysis negates any belief in the weak form efficient market hypothesis, which assumes that past performance data cannot be used to predict securities prices, and that the securities markets "price-in" information instantly. This "incongruence" with all forms of the EMH is cited as the greatest criticism of technical analysis.
