**NEW QUESTION: 1**You are part of a scrum team that is trying to identify user stories to complete in the next sprint. You and the team need to select user stories for the next sprint. What should you do?**A.** Have the scrum master decide which user stories to complete within the sprint.**B.** Have the product owner decide which user stories to complete within the sprint.**C.** Have the team decide which user stories to complete within the sprint.**D.** Order the user stories by their story points. Select the top stories based on the team's velocity.**Answer: C****Explanation:** The Sprint is a fixed-length event (30 days or less) in which the Development Team forecasts items from the Product Backlog and develops the items in the Sprint Backlog according to the acceptance criteria and their Definition of "Done."**Professional Scrum Development with Microsoft Visual Studio 2012 p.169**

**NEW QUESTION: 2**An organization is already certified to an international security standard. Which mechanism would BEST help to further align the organization with other data security regulatory requirements as per new business needs?**A.** Business impact analysis (BIA)**B.** Gap analysis**C.** Technical vulnerability assessment**D.** Key performance indicators (KPIs)**Answer: B****Explanation:**Explanation/Reference:Explanation:Gap analysis would help identify the actual gaps between the desired state and the current implementation of information security management. BIA is primarily used for business continuity planning. Technical vulnerability assessment is used for detailed assessment of technical controls, which would come later in the process and would not provide complete information in order to identify gaps.

**NEW QUESTION: 3**You manage a SQL Server Master Data Services (MDS) environment. A new application requires access to the product data that is available in the MDS repository. You need to design a solution that gives the application access to the product data with the least amount of development effort. What should you do?**A.** Use change data capture on the product entity tables.**B.** Access the product entity tables in the MDS database directly.**C.** Use SQL Server

Integration Services (SSIS) to extract the data and put it in a staging database.**D. Create a Subscription View in MDS.****Answer: D**
