NEW QUESTION: 1You are the Office 365 administrator for an organization. You do not plan to use Microsoft SharePoint Online. You must create several recipient objects that meet the following requirements: * an object that allows multiple users to read and respond to email for a department * an object whose members change automatically based on their department * an object that allows users to reserve and schedule the use of a portable display projector You need to create the recipient objects. Which recipient type should you use to meet each requirement? To answer, select the appropriate recipient object type in the dialog box in the answer area. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Explanation A shared mailbox is a mailbox that multiple users can use to read and send email messages. The membership list for dynamic distribution groups is calculated each time a message is sent to the group, based on the filters and conditions that you define. When an email message is sent to a dynamic distribution group, it's delivered to all recipients in the organization that match the criteria defined for that group. An equipment mailbox is a resource mailbox assigned to a resource that's not location specific, such as a portable computer, projector, microphone, or a company car. After an administrator creates an equipment mailbox, users can easily reserve the piece of equipment by including the corresponding equipment mailbox in a meeting request.
