NEW QUESTION: 1 While configuring a new access layer switch, the administrator, Joe, was advised that he needed to make sure that only devices authorized to access the network would be permitted to login and utilize resources. Which of the following should the administrator implement to ensure this happens? **A. 802.1x** **B. VLAN Management** **C. Log Analysis** **D. Network separation**
Answer: A

NEW QUESTION: 2 Policy template is collection of several policy. To audit the security status of different terminal hosts and the behavior of end users, administrators need to customize different policy templates for protecting and managing terminal hosts. Which of the following are correct regarding the policy template? (Multiple choices) **A.** When configure policy template, you can inherit the parent template and modify the parent template policy. **B.** If different policy templates are applied to departments and accounts, the policy template assigned to the highest priority will take effect. The priority relationship of departments and accounts is: account > department. **C.** You can assign policy template to a network segment. **D.** Only policy in the policy template can be used. Administrators can't customize the policy.
Answer: B,C

NEW QUESTION: 3 Assuming a 360-day year and that CyberAge continues paying on the last day of the credit period, the entity's weighted-average annual interest rate for trade credit ignoring the effects of compounding) for these two vendors is: **A. 30.2%** **B. 27.0%** **C. 28.0%** **D. 25.2%**
Answer: D
Explanation: If the entity pays Web [...Taster within 10 days, it will save US \$500 (\$25,000 2%). Thus, the entity is effectively paying US \$500 to retain US \$24,500 (\$25,000 - \$500) for 20 days (30 - 10). The annualized interest rate on this borrowing is 36.7346% [(US \$500 + \$24,500) x 360 days / 20 days)]. Similarly, the entity is, in effect, paying Softidee US \$2,500 (\$50,000 5%) to hold US \$47,500 (\$50,000 - \$2,500) for 80 days (90 - 10). The annualized rate on this borrowing is 23.6842% [(US \$2,500 - \$47,500) 360 days / 80 days)]. The average amount borrowed from Web Master is US \$16,333.33 [(US \$24,500 x 1 month x 20 days - 30 days)]. The average amount borrowed from web master is US \$126,666.67 [(US \$47,500 x 3 months x 80 days / 90 days)]. Thus, the weighted average of these two rates based on average borrowing is 25.2% [(US \$16,333.33 x 36.7346%) + (\$126,666.67 x 23.6824%) / (\$16,333.33 + \$126,666.67)]. This calculation however, understates the true cost of not taking the discount because it does not consider the effects of compound. CyberAge Outlet, a relatively new store, is a cafe that offers customers the opportunity to browse the Internet or play computer games at their tables while they drink coffee. The customer pays a fee based on the amount of time spent signed on to the computer. The store also sells books, tee-shirts, and computer accessories. CyberAge has been paying all of its bills on the last day of the payment period, thus forfeiting all supplier discounts. Shown below are data on CyberAge's two major vendors, including average monthly purchases and credit terms.

NEW QUESTION: 4 Which two configurations use root-data-data partitioning? (Choose two.) **A.** FAS2650 with 1.8 TB internal SAS drives **B.** AFF A220 with 3.8 TB internal SSD drives **C.** FAS8080

with 1.8 TB external SAS drives **D**. AFF A800 with 3.8 TB internal NVMe SSD drives **Answer: C,D**
