**NEW QUESTION: 3**The systems administrator did not immediately notify the security officer about a malicious attack. An information security manager could prevent this situation by:**A.** regularly testing the intrusion detection system (IDS).**B.** periodically testing the incident response plans.**C.** periodically reviewing incident response procedures.**D.** establishing mandatory training of all personnel.**Answer: B**Explanation:ExplanationSecurity incident response plans should be tested to find any deficiencies and improve existing processes. Testing the intrusion detection system (IDS) is a good practice but would not have prevented this situation. All personnel need to go through formal training to ensure that they understand the process, tools and methodology involved in handling security incidents. However, testing of the actual plans is more effective in ensuring the process works as intended. Reviewing the response procedures is not enough; the security response plan needs to be tested on a regular basis.

**NEW QUESTION: 4**CORRECT TEXTIf a medication is to be taken a.c., it should be taken when?**Answer:** Explanation:before meals.
