NEW QUESTION: 1Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.Start of repeated scenario.Your network contains an Active Directory domain named contoso.com. The domain contains a single site named Site1. All computers are in Site1.The Group Policy objects (GPOs) for the domain are configured as shown in the exhibit. (Click the Exhibit button.)The relevant users and client computer in the domain are configured as shown in the following table.End of repeated scenario.You are evaluating what will occur when you set user Group Policy loopback processing mode to Replace in A7.Which GPO or GPOs will apply to User2 when the user signs in to Computer1 after loopback processing is configured?**A.** A7 only**B.** A3, A5, A1, and A7 only**C.** A3, A1, A5, A6 and A7 **D.** A1 and A7 only**Answer: A**Explanation:Explanation/Reference:Explanation:In Replace Mode, the user's list of GPOs is not gathered. Only the list of GPOs based on the computer object is used.References:

<https://support.microsoft.com/en-us/help/231287/loopback-processing-of-group-policy>

NEW QUESTION: 2Click the Exhibit button.Which two statements are valid about this process? (Choose two.)**A.** Because all transitions must be evaluated, there is overhead in the process.**B.** This process must be restructured because it is not valid to have more than eight transitions.**C.** An otherwise transition should be added to this process for unknown test cases.**D.** A group placed around the Start and all Map activities can unify the error handling.**Answer: A,C**

NEW QUESTION: 3

各ドロップダウンリストから適切な攻撃を選択して、対応する図解された攻撃にラベルを付けます。

手順：攻撃は1回しか使用できず、選択するとドロップダウンリストから消えます。シミュレーションが完了したら、[完了]ボタンを選択して送信してください。**Answer:** Explanation:Explanation 1: Spear phishing is an e-mail spoofing fraud attempt that targets a specific organization, seeking unauthorized access to confidential data. As with the e-mail messages used in regular

phishing expeditions, spear phishing messages appear to come from a trusted source. Phishing messages usually appear to come from a large and well-known company or Web site with a broad membership base, such as eBay or PayPal. In the case of spear phishing, however, the apparent source of the e-mail is likely to be an individual within the recipient's own company and generally someone in a position of authority.2: The Hoax in this question is designed to make people believe that the fake AV (anti- virus) software is genuine.3: Vishing is the act of using the telephone in an attempt to scam the user into surrendering private information that will be used for identity theft. The scammer usually pretends to be a legitimate business, and fools the victim into thinking he or she will profit.4: Phishing is the act of sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft. Phishing email will direct the user to visit a website where they are asked to update personal information, such as a password, credit card, social security, or bank account numbers, that the legitimate organization already has. The website, however, is bogus and set up only to steal the information the user enters on the page.5: Similar in nature to e-mail phishing, pharming seeks to obtain personal or private (usually financial related) information through domain spoofing. Rather than being spammed with malicious and mischievous e-mail requests for you to visit spoof Web sites which appear legitimate, pharming 'poisons' a DNS server by infusing false information into the DNS server, resulting in a user's request being redirected elsewhere. Your browser, however will show you are at the correct Web site, which makes pharming a bit more serious and more difficult to detect. Phishing attempts to scam people one at a time with an e-mail while pharming allows the scammers to target large groups of people at one time through domain spoofing. References:
