NEW QUESTION: 1 Which of the following statements about big data processing technology are true? (Multiple Choice) **A.** Different from traditional data processing technology, big data processing technology processes data in various ways based on the data value. **B.** In the big data era, distributed parallel processing is employed to process data. This data processing technique features flexible component scalability, powerful data management capability, and unified management. **C.** Big data technology delivers more powerful processing capabilities, but leads to more complex management than traditional technology. **Answer: A,B,C**

NEW QUESTION: 2 Which of the following is the best reason for performing risk assessment? **A.** To analyze the effect on the business **B.** To budget appropriately for the application of various controls **C.** is incorrect. Analyzing the effect of risk on an enterprise is the part of the process while performing risk assessment, but is not the reason for doing it. **D.** is incorrect. Budgeting appropriately is one the results of risk assessment but is not the reason for performing the risk assessment. **E.** To satisfy regulatory requirements **F.** Explanation: Risk assessment is a process of analyzing the identified risk, both quantitatively and qualitatively. Quantitative risk assessment requires calculations of two components of risk, the magnitude of the potential loss, and the probability that the loss will occur. While qualitatively risk assessment checks the severity of risk. Hence risk assessment helps in determining the present state of the risk. **G.** To determine the present state of risk **Answer: G** Explanation: is incorrect. Performing risk assessment may satisfy the regulatory requirements, but is not the reason to perform risk assessment.

NEW QUESTION: 3 Your company has a main office and one branch office. The main office has a print server named Printer1. The branch office has a print server named Printer2. Printer1 manages 15 printers and Printer2 manages seven printers. You add Printer2 to the Print Management console on Printer1. You need to send an automatic notification when a printer is not available. What should you do? **A.** Enable the Show informational notifications for local printers option on both print servers. **B.** Configure an e-mail notification for the Printers With Jobs printer filter. **C.** Enable the Show informational notifications for network printers option on both print servers. **D.** Configure an e-mail notification for the Printers Not Ready printer filter. **Answer: D** Explanation: Print Management can help you find printers that have an error condition by using filters. It can also send e-mail notifications or run scripts when a printer or print server needs attention.
