Your real journey to success in H19-436\_V1.0 exam, actually starts with our exam questions that is the excellent and verified source of your targeted Enhance Your Tech Skills By Passing Huawei H19-436\_V1.0 Certification Exam.

**NEW QUESTION: 1** Click the Exhibit button. Which attribute CANNOT be accessed from a Mountain object?  
**A.** name **B.** view **C.** climb **D.** height  
**Answer: D**

**NEW QUESTION: 2** Which of the following describes the difference between SaaS and IaaS?  
**A.** SaaS defines a standard while IaaS implements the standard. **B.** SaaS implements security while IaaS provides information. **C.** SaaS provides applications while IaaS provides equipment. **D.** SaaS enables the software developer while IaaS provides the specifications.  
**Answer: C**  
Explanation: Explanation/Reference: Explanation: Software as a service (SaaS) allows users to connect to and use cloud-based apps over the Internet. References: <https://azure.microsoft.com/en-us/overview/what-is-saas/>

**NEW QUESTION: 3** Which statement is TRUE about the operation of a packet sniffer?  
**A.** It must be placed on a single virtual LAN interface. **B.** They are required for firewall operation and stateful inspection. **C.** It can only have one interface on a management network. **D.** The Ethernet card must be placed in promiscuous mode.  
**Answer: D**  
Explanation: Section: Threats and Vulnerabilities  
Explanation/Reference: Explanation: A sniffer (packet sniffer) is a tool that intercepts data flowing in a network. If computers are connected to a local area network that is not filtered or switched, the traffic can be broadcast to all computers contained in the same segment. This doesn't generally occur, since computers are generally told to ignore all the comings and goings of traffic from other computers. However, in the case of a sniffer, all traffic is shared when the sniffer software commands the Network Interface Card (NIC) to stop ignoring the traffic. The NIC is put into promiscuous mode, and it reads communications between computers within a particular segment. This allows the sniffer to seize everything that is flowing in the network, which can lead to the unauthorized access of sensitive data. A packet sniffer can take the form of either a hardware or software solution. A sniffer is also known as a packet analyzer.
