Last but not the least, we protect all you information from getting revealed.

NEW QUESTION: 1A. Option D**B.** Option A**C.** Option C**D.** Option B**Answer: C**Explanation:The files needed are no longer available on the local Hard drive. We need to connect the server to the Internet. Important to note that when starting with Windows Server 2012 R2 and Windows 8, the feature files for .NET Framework 3.5 (which includes .NET Framework 2.0 and .NET Framework 3.0) are not available on the local computer by default. The files have been removed. Files for features that have been removed in a Features on Demand configuration, along with feature files for .NET Framework 3.5, are available through Windows Update. By default, if feature files are not available on the destination server that is running Windows Server 2012 R2 Preview or Windows Server 2012 R2, the installation process searches for the missing files by connecting to Windows Update. You can override the default behavior by configuring a Group Policy setting or specifying an alternate source path during installation, whether you are installing by using the Add Roles and Features Wizard GUI or a command line.

NEW QUESTION: 2 As defined in the 802.11 specification, legacy Power Save requires an inefficient back-and-forth frame exchange process. Due to this inefficiency, many WLAN device implementations use a variation of 802.11 Power Save to accomplish the same function.What non-standard power save behavior is used by most Wi-Fi devices in actual legacy Power Save implementations?**A.** Client devices ignore the TIM field and automatically send PS-Poll frames after every beacon.**B.** The Beacon interval is changed from the default 100 time units to 10 or less time units.**C.** After each beacon, the AP attempts to empty its frame buffer by sending Wake-on-WLAN frames to wake each dozing client.**D.** Clients send null data frames to the AP and switch the power management bit from 1 to 0 to receive queued data.**Answer: D**

NEW QUESTION: 3 The "gray box testing" methodology enforces what kind of restriction?**A.** The internal operation of a system is only partly accessible to the tester.**B.** The internal operation of a system is completely known to the tester.**C.** Only the external operation of a system is accessible to the tester.**D.** Only the internal operation of a system is known to the tester.**Answer: A**

NEW QUESTION: 4 You have been assigned the role of Chief Enterprise Architect within a leading professional services company that specializes in providing outsourcing services.The

company has over 20,000 professionals and works on some of the world's largest outsourcing projects.Outsourcing services include business processes, infrastructure, and service management. The company also provides business consulting services. Roughly half of its turnover comes from the private sector and hal from the public sector.With numerous service areas and a large number of diverse engagements in progress at any given time, overall engagement management within the company has become challenging. The company has recently had a number of high profile projects that have overrun on budget and under delivered, thereby damaging its reputation and adversely impacting its share price.The company has established an Enterprise Architecture program based on the TOGAF standard, sponsored jointly by the Chief Executive Officer and Chief Information Officer. An Architecture Board has been formed comprised of IT staff executives and executives from the major service areas and consulting practice.The Enterprise Architecture (EA) team has been working with the Strategic Planning team to create a strategic Enterprise Architecture to address these issues. The EA team has defined a framework and held workshops with key stakeholders to define a set of architecture principles to govern the architecture work. They have completed an Architecture Version at a strategic level and laid our Architecture Definitions for the four domains. They have set out an ambitious vision of the future of the company over a five-year period. This will include three distinct transformations.The CIO has made it clear that prior to the approval of the detailed implementation and Migration plan, the EA team will need to assess the risks associated with the proposed architecture. He has received concerns from some of the vice presidents across the company that the proposed architecture may be too ambitious and they are not sure it can produce sufficient value to warrant the risks.You have been asked to recommend an approach to satisfy these concerns.Based on the TOGAF Standard, Version 9.2, which of the following is the best answer?**A.** The EA team should bring together information about potential solutions from the appropriate sources.Once the target architecture has been assembled, it should be analyzed using a state evolution table to determine the Transition Architectures. A value realization process should then be established to ensure that the concerns raised are addressed.**B.** The EA team should apply an interoperability analysis to evaluate any potentital issues across the architecture. This should include the development of a matrix showing the interoperability requirements.Once all of the concerns have been resolved, the EA team should finalize the Architecture Roadmap and the Implementation and Migration Plan.**C.** Before preparing the detailed Implementation and Migration plan, the EA team should review and consolidate the gap analysis results from Phases B to D. This can be used to understand the transformations that are required to achieve the proposed Target Architecture. The EA team should then assess the readiness of the organization to undergo change. Once the architecture has been assembled, it should be analyzed using a state evolution table to determine the Transition Architectures.**D.** The EA team should evaluate the organization's readiness to undergo change. This will allow the risks associated with the transformations to be identified and mitigated for. It will also identify improvement actions to be worked into the Implementaion and Migration Plan. The Business Value Assessment technique should then be used to detetmine the business value and associated risks for the transformation.**Answer: D**
