NEW QUESTION: 2A store runs all point of sale (POS) registers in offline mode.Which three of the following operations can you perform? Each correct answer presents a complete solution.
A. blind close shift**B.** close shift**C.** safe drop**D.** bank drop**E.** view reports**Answer: C,D,E**

NEW QUESTION: 3DRAG DROPYou need to design the file management solution.What should you do? To answer, drag the appropriate technology to the correct office. Each technology may be usedonce, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:Case Study: 6Contoso Ltd, Case BBackground OverviewContoso, Ltd., is a software development company. Contoso has a main office in London and two branchoffices, one in Madrid and the other in Dublin. The company is in the process of adopting Microsoft Azureto host business critical resources and applications. Contoso has an Active Directory Domain Services (AD DS) domain named contoso.com. All devices in thethree offices are members of the domain. Each office has a dedicated organizational unit (OU) in the root ofthe domain named London. Madrid, and Dublin, respectively. Each office OU has three child OUs namedComputers, Users, and Groups.The local Administrator account is disabled on all client devices in the domain by using a Group Policy object (GPO) named SecurityConflguration that is linked to the root of the domain. Contoso's securitydepartment also has a GPO named WSUSConfiguration. WSUSConfiguration defines the configuration ofWindows Update Services on the Windows Server Update Services (WSUS) server named WSUS1.You have a GPO named RemoteSales that uses a WMI filter. The GPO prevents users from launchingapplications that are not approved.DNS ServicesContoso uses a DNS service that is installed on two domain controllers in the main office. The domain controllers are named DO and DC2. Both DO and DC2 run Windows Server 2008 R2. Both domaincontrollers host Active Directory integrated zones named contoso.com and lab.contoso.com. The zones areconfigured to allow only secure updates.ResearchContoso

creates a new research department to develop integration between Contoso's software and publiccloud services.Finance DepartmentUsers in the finance department use a client-server application named App1. App1 uses custom ActiveDirectory attributes to store encryption keys. App1 is a business critical application that must be migrated toWindows Azure.A server named SERVER2 hosts Appl. SERVER2 runs Windows Server 2008 R2. The disk configuration for SERVER2 is shown in the following table:A server named SERVER1 hosts a database that is used by Appl. SERVER1 runs Windows Server 2008 R2and SQL Server 2008 R2. The disk configuration for SERVER1 is shown in the following table:The Contoso management team plans to increase the use of Appl. To accommodate these plans, the size ofthe datable must be increasedSales DepartmentUsers in the sales department use laptop computers when they travel. Salespeople use a legacy applicationnamed ContosoSales on their laptop computers. Salespeople can use a pool of shared desktop computers ineach office.The ContosoSales app is dependent on a specific registry key that is frequently overwritten by third-partyapplications. This causes the ContosoSales app to stop working.Business RequirementsAll DNS servers must be placed in a physically secure location.Software development departmentAll software developers must migrate their servers and workstations to the DNS domain lab.contoso.com toensure that frequent changes to DNS do not interfere with the production environment.Finance departmentAll servers that host App1 must be migrated to Windows Azure. A new Azure virtual machine (VM) namedCL0UD2 must be deployed to Windows Azure.Sales departmentUsers in the sales department should not be able to run applications on their laptop computers that are notapproved by the security department. Users in the sales department should have no such restrictions whilethey work on the desktop computers in the office.Technical Requirements App1 requirementsYou have the following requirements:The size of the database for App1 must be increased to 8 TB.*The encryption keys for App1 should not be replicated to the offices where physical server*security is not guaranteed.The amount of disk space that is used by Windows Azure must be minimized.*Infrastructure requirementsYou have the following requirements:The lab.contoso.com DNS domain zone must not be replicated or transferred to DNS servers*outside of the London office.A new DNS domain zone named research.contoso.com must be deployed for users in the*research department.The research.contoso.com DNS domain zone must be protected by using DNS Security*Extensions {DNSSEC).All computers in the London and Madrid offices must install Windows Updates from the*server WSUS1.A new domain controller for the contoso.com domain must be deployed in the Madrid*office.Replication traffic must be minimized when the new domain controllers are deployed.*New WMI filters must not conflict with existing WMI filters.*
