Answer: C

NEW QUESTION: 3Your network contains a Windows Server Update Services (WSUS) server named Server1. All client computers are configured to download updates from Server1. Server1 is configured only to synchronize manually to Microsoft Update. Your company deploys a new Microsoft application. You discover that the new application is not listed on the Products and Classifications list. You synchronize the WSUS server. You need to ensure that updates for the new application are available to all of the client computers. What should you do? To answer, move the appropriate actions from the Possible Actions list to the Necessary Actions area and arrange them in the correct order. Select and Place:
Answer: Explanation: Correct answer(s):
1. Synchronize the WSUS server
2. Modify the Products and Classifications settings
3. Approve the updates
