**NEW QUESTION: 1**John Adams is an HR partner in the ACME organization. ACME IT wants to limit access to HR servers to designated IP addresses to minimize malware infection and unauthorized access risks. Thus, gateway policy permits access only from Join's desktop which is assigned an IP address 10.0.0.19 via DHCP.John received a laptop and wants to access the HR Web Server from anywhere in the organization. The IT department gave the laptop a static IP address, but the limits him to operating it only from his desk.The current Rule Base contains a rule that lets John Adams access the HR Web Server from his laptop.He wants to move around the organization and continue to have access to the HR Web Server.To make this scenario work, the IT administrator:1) Enables Identity Awareness on a gateway, selects AD Query as one of the Identity Sources.2) Adds an access role object to the Firewall Rule Base that lets John Adams PC access the HR Web Server from any machine and from any location.John plugged in his laptop to the network on a different network segment and he is not able to connect.How does he solve this problem?**A.** John should install the identity Awareness Agent**B.** The firewall admin should install the Security Policy**C.** Investigate this as a network connectivity issue**D.** John should lock and unlock the computer**Answer: D**

**NEW QUESTION: 2**The Quality Assurance team is testing a new third party developed application. The Quality team does not have any experience with the application. Which of the following is the team performing?**A.** White box testing**B.** Penetration testing**C.** Grey box testing**D.** Black box testing**Answer: D**Explanation:Explanation/Reference:Explanation:Black-box testing is a method of software testing that examines the functionality of an application without peering into its internal structures or workings. This method of test can be applied to virtually every level of software testing: unit, integration, system and acceptance. It typically comprises most if not all higher level testing, but can also dominate unit testing as well.Specific knowledge of the application's code/internal structure and programming knowledge in general is not required. The tester is aware of what the software is supposed to do but is not aware of

how it does it. For instance, the tester is aware that a particular input returns a certain, invariable output but is not aware of how the software produces the output in the first place.
