**NEW QUESTION: 1**Case Study 1 - Litware, Inc.OverviewLitware, Inc. is an online retailer that uses Microsoft Power BI dashboards and reports. The company plans to leverage data from Microsoft SQL Server databases, Microsoft Excel files, text files, and several other data sources. Litware uses Azure Active Directory (Azure AD) to authenticate users.Existing EnvironmentSales DataLitware has online sales data that has the SQL schema shown in the following table.In the Date table, the dateid column has a format of yyyyymmdd and the month column has a format of yyyyymm. The week column in the Date table and the weekid column in the Weekly\_Returns table have a format of yyyyww. The regionid column can be managed by only one sales manager.Data ConcernsYou are concerned with the quality and completeness of the sales data. You plan to verify the sales data for negative sales amounts.Reporting RequirementsLitware identifies the following technical requirements:- Executives require a visual that shows sales by region.- Regional managers require a visual to analyze weekly sales and returns.- Sales managers must be able to see the sales data of their respective region only.- The sales managers require a visual to analyze sales performance versus sales targets.- The sales department requires reports that contain the number of sales transactions.- Users must be able to see the month in reports as shown in the following example: Feb 2020.- The customer service department requires a visual that can be filtered by both sales month and ship month independently.You need to create a relationship between the Weekly\_Returns table and the Date table to meet the reporting requirements of the regional managers.What should you do?**A.** Add the Weekly\_Returns data to the Sales table by using related DAX functions.**B.** Create a new table based on the Date table where date-id is unique, and then create a many-to-many relationship to Weekly\_Returns.**C.** In the Weekly\_Returns table, create a new calculated column named date-id in a format of yyyyymmdd and use the calculated column to create a relationship to the Date table.**Answer: C**Explanation:Scenario: Region managers require a visual to analyze weekly sales and returns.To relate the two tables we need a common column.
