You can define four types of rate schedules. The following table lists the four types of rate schedules and indicates how you can use each rate schedule type in Oracle Projects.  
**Note:** \*If you select the option to use planning rates, then you can choose the cost and revenue rate schedules to use to generate amounts. If you do not select the option to use planning rates, then Oracle Projects automatically chooses the rate schedules that are used to calculate actual cost and revenue (bill) amounts. \*You must specify rate schedules for resource class. When Oracle Projects is unable to determine the actual or planning rates to apply in a calculation, Oracle Projects automatically applies rates from the default rate schedules you specify for resource class.
