NEW QUESTION: 1 Several users have reported that when attempting to save documents in team folders, the following message is received: The File Cannot Be Copied or Moved - Service Unavailable. Upon further investigation, it is found that the syslog server is not obtaining log events from the file server to which the users are attempting to copy files. Which of the following is the MOST likely scenario causing these issues?
A. The file server is experiencing high CPU and memory utilization
B. All the available space on the file server is consumed
C. The network is saturated, causing network congestion
D. Malicious processes are running on the file server
Answer: C

NEW QUESTION: 2 Was ist die führende Tabelle für die FI / CO-Belegreplikation aus SAP-Quellsystemen?
A. Central Finance transfer table (CFIN_ACCHD)
B. Documents header table (/1LT/CF_E_HEADER)
C. Controlling document header table (COBK)
D. Accounting document header table (BKPF)
Answer: A

NEW QUESTION: 3 A post-breach forensic investigation revealed that a known vulnerability in Apache Struts was to blame for the Equifax data breach that affected 143 million customers. A fix was available from the software vendor for several months prior to the intrusion. This is likely a failure in which of the following security processes?
A. Secure deployment lifecycle
B. Security awareness training
C. vendor risk management
D. Patch management
Answer: D
Explanation: Patch management is that the method that helps acquire, test and install multiple patches (code changes) on existing applications and software tools on a pc, enabling systems to remain updated on existing patches and determining that patches are the suitable ones. Managing patches so becomes simple and simple. Patch Management is usually done by software system firms as a part of their internal efforts to mend problems with the various versions of software system programs and also to assist analyze existing software system programs and discover any potential lack of security features or different upgrades. Software

patches help fix those problems that exist and are detected solely once the software's initial unharness. Patches mostly concern security while there are some patches that concern the particular practicality of programs as well.

NEW QUESTION: 4Examine the output of the following commands:Which statement is true concerning these resource controls settings?**A.** The zone.max-lwps resource control will deny zombie processes from exhausting the process table.**B.** The zone.max-processes resource control will deny zombie processes from exhausting the resource table.**C.** The zone.max-lwps resource control was set to its value when the zone.max-processes resource control was set to its value.**D.** The prctl command can be used to change the max value for these resource controls.**Answer: B****Explanation:**Explanation/Reference:* zone.max-processesMaximum number of process table slots simultaneously available to this zone.Because both normal processes and zombie processes take up process table slots, the max-processes control thus protects against zombies exhausting the process table. Because zombie processes do not have any LWPs by definition, the max-lwps control cannot protect against this possibility Note:* prctl - operations on a processUse the prctl command to make runtime interrogations of and modifications to the resource controls associated with an active process, task, or project on the system.
