NEW QUESTION: 3 Which of the following is the key benefit of control self-assessment (CSA)? **A.** Improved fraud detection since internal business staff are engaged in testing controls **B.** Management ownership of the internal controls supporting business objectives is reinforced. **C.** Audit expenses are reduced when the assessment results are an input to external audit work. **D.** Internal auditors can shift to a consultative approach by using the results of the assessment. **Answer: B** **Explanation:** The objective of control self-assessment is to have business management become more aware of the importance of internal control and their responsibility in terms of corporate governance. Reducing audit expenses is not a key benefit of control self-assessment (CSA). Improved fraud detection is important, but not as important as ownership, and is not a principal objective of CSA. CSA may give more insights to internal auditors, allowing them to take a more consultative role; however, this is an additional benefit, not the key benefit. NEW QUESTION: 4 Which of the following could be BEST defined as the likelihood of a threat agent taking advantage of a vulnerability? **A.** A countermeasure **B.** An exposure **C.** A residual risk **D.** A risk **Answer: D** **Explanation:** Risk is the likelihood of a threat agent taking advantage of a vulnerability and the corresponding business impact. If a firewall has several ports open, there is a higher likelihood that an intruder will use one to access the network in an unauthorized method. The following answers are incorrect: Residual Risk is very different from the notion of total risk. Residual Risk would be the risk that still exists after countermeasures have been implemented. Total risk is the amount of risk a company faces if it chooses not to implement any type of safeguard. Exposure: An exposure is an instance of being exposed to losses from a threat agent. Countermeasure: A countermeasure or a safeguard is put in place to mitigate the potential risk. Examples of countermeasures include strong password management, a security guard.
