NEW QUESTION: 3 When, in aggregate, people value having money now substantially more than they value having money in the future, interest rates will become _____.**A.** higher.**B.** the same.**C.** lower.**Answer: A**Explanation:The rates will become higher to move money from the present to the future.

NEW QUESTION: 4DRAG DROP**Answer:** Explanation:Explanation:Box1: Process Full:When Process Full is executed against an object that has already been processed,Analysis Services drops all data in the object, and then processes the object. This kind of processing is required when a structural change has been made to an object, for example, when an attribute hierarchy is added, deleted, or renamed.Box 2: Process DefaultDetects the process state of database objects, and performs processing necessary to deliver unprocessed or partially processed objects to a fully processed state. If you change a data binding, Process Default will do a Process Full on the affected object.Box 3:Not Process Update: Forces a re-read of data and an update of dimension attributes.Flexible aggregations and indexes on related partitions will be dropped.==========Topic 1, Wide World Importers BackgroundWide World Importers imports and sells clothing. The company has a multidimensionalMicrosoft SQL Server Analysis Services instance. The server has 80 gigabytes (GB) of available physical memory. The following installed services are running on the server: *SQL Server Database Engine* SQL Server Analysis Services (multidimensional)The database

engine instance has been configured for a hard cap of 50 GB, and it cannot be lowered. The instance contains the following cubes: SalesAnalysis, OrderAnalysis.Reports that are generated based on data from the OrderAnalysis cube take more time to complete when they are generated in the afternoon each day. You examine the server and observe that it is under significant memory pressure.Processing for all cubes must occur automatically in increments. You create one job to process the cubes and another job to process the dimensions. You must configure a processing task for each job that optimizes performance. As the cubes grown in size, the overnight processing of the cubes often do not complete during the allowed maintenance time window.SalesAnalysisThe SalesAnalysis cube is currently being tested before being used in production. Users report that day name attribute values are sorted alphabetically. Day name attribute values must be sorted chronologically. Users report that they are unable to query the cube while any cube processing operations are in progress. You need to maximize data availability during cube processing and ensure that you process both dimensions and measures.OrderAnalysisThe OrderAnalysis cube is used for reporting and ad-hoc queries from Microsoft Excel. The data warehouse team adds a new table named Fact.Transaction to the cube. TheFact.Transaction table includes a column named Total Including Tax. You must add a new measure named Transactions - Total Including Tax to the cube. The measure must be calculated as the sum of the Total Including Tax column across any selected relevant dimensions.FinanceThe Finance cube is used to analyze General Ledger entries for the company.Requirements*You must minimize the time that it takes to process cubes while meeting the following requirements:*The Sales cube requires overnight processing of dimensions, cubes, measure groups, and partitions.*The OrderAnalysis cube requires overnight processing of dimensions only.*The Finance cube requires overnight processing of dimensions only.==========
