NEW QUESTION: 2Which management interface is selected by the Cisco APIC by default if an in band management interface and an out of-band management interface exist?**A.** Out-of band is preferred**B.** The interface that has the highest priority is selected**C.** In-band is preferred**D.** The first configured interface is selected**Answer: A****Explanation:**Guidelines and Limitations for In-Band and Out-of-Band ManagementThere is no configuration available to leak the out-of-band management plane from the APIC into the data plane. This can only be accomplished by physically cabling out-of-band network devices directly into the data plane. Cisco does not recommend this setup. The preferred setup for this type of design would be to utilize in-band management.
