While the threshold to a good ISC IT corporation is still very high, so the people more certified will be more welcome for the employer, You can download the demo of SSCP free dumps to check the accuracy.

NEW QUESTION: 1You network contains an Active Directory domain named adatum.com and an Azure Active Directory (Azure AD) tenant named adatum.onmicrosoft.com. Adatum.com contains the user accounts in the following table. Adatum.onmicrosoft.com contains the user accounts in the following table. You need to implement Azure AD Connect. The solution must follow the principle of least privilege. Which user accounts should you use? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point.
Answer: Explanation: Explanation
Box 1: User5
In Express settings, the installation wizard asks for the following: AD DS Enterprise Administrator credentials Azure AD Global Administrator credentials
The AD DS Enterprise Admin account is used to configure your on-premises Active Directory. These credentials are only used during the installation and are not used after the installation has completed. The Enterprise Admin, not the Domain Admin should make sure the permissions in Active Directory can be set in all domains.
Box 2: UserA
Azure AD Global Admin credentials are only used during the installation and are not used after the installation has completed. It is used to create the Azure AD Connector account used for synchronizing changes to Azure AD. The account also enables sync as a feature in Azure AD.

NEW QUESTION: 2Which of the following is the FIRST step in protecting data's confidentiality?
A. Identify which information is sensitive
B. Implement encryption
C. Install a firewall
D. Review all user access rights
Answer: A
Explanation: Explanation/Reference: In order to protect the confidentiality of the data. The following answers are incorrect because : Install a firewall is incorrect as this would come after the information has been identified for sensitivity levels. Implement encryption is also incorrect as this is one of the mechanisms to protect the data once it has been identified. Review all user access rights is also incorrect as this is also a protection mechanism for the identified information. Reference : Shon Harris AIO v3 , Chapter-4 : Access Control , Page : 126

NEW QUESTION: 3You are developing a Web application. Your code restricts access to some pages based on the user's credentials. You need to configure IIS to supply the user's Windows credentials to your Web application. These credentials must be encrypted. What should you do?
A. Disable Anonymous access. Enable Integrated Windows authentication.
B. Enable Anonymous access. Enable Basic authentication.
C. Enable Anonymous access. Enable Integrated Windows authentication.
D. Disable Anonymous access. Enable Basic authentication.
Answer: A
