**NEW QUESTION: 4** You have an Azure subscription that contains an Azure file share. You have an on-premises server named Server1 that runs Windows Server 2016. You plan to set up Azure File Sync between Server1 and the Azure file share. You need to prepare the subscription for the planned Azure File Sync. Which two actions should you perform in the Azure subscription? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation: Explanation First action: Create a Storage Sync Service The deployment of Azure File Sync starts with placing a Storage Sync Service resource into a resource group of your selected subscription. Second action: Run Server Registration Registering your Windows Server with a Storage Sync Service establishes a trust relationship between your server (or cluster) and the Storage Sync Service. A server can only be registered to one Storage Sync Service and can sync with other servers and Azure file shares associated with the same Storage Sync Service. The Server Registration UI should open automatically after

installation of the Azure File Sync agent.
