NEW QUESTION: 4 Which of the following situations would be the MOST concern to a security manager?
A. A Trojan was found to be installed on a system administrator's laptop
B. The logon ID for a terminated systems analyst still exists on the system
C. The help desk has received numerous reports of users receiving phishing e-mails
D. Audit logs are not enabled on a production server
Answer: A
Explanation: The discovery of a Trojan installed on a system's administrator's laptop is highly significant since this may mean that privileged user accounts and passwords may have been compromised. The other choices, although important, do not pose as immediate or as critical a threat.
