NEW QUESTION: 2 Your network contains an Active Directory domain named contoso.com. You create a user account named User1. The properties of User1 are shown in the exhibit. (Click the Exhibit button.) You plan to use the User1 account as a service account. The service will forward authentication requests to other servers. You need to ensure that you can view the Delegation tab from the properties of the User1 account. What should you do first? **A.** Modify the Security settings of User1. **B.** Configure a Service Principal Name (SPN) for User1. **C.** Modify the user principal name (UPN) of User1. **D.** Configure the Name Mappings of User1. **Answer: B**
