NEW QUESTION: 1 Which of the following is an output of the Perform Integrated Change Control process?
A. Organizational process assets updates
B. Change requests
C. Project document updates
D. Deliverables
Answer: C
Explanation: Explanation/Reference: Explanation: Process: 4.5 Perform Integrated Change Control Definition: Perform Integrated Change Control is the process of reviewing all change requests; approving changes and managing changes to deliverables, organizational process assets, project documents, and the project management plan; and communicating their disposition. It reviews all requests for changes or modifications to project documents, deliverables, baselines, or the project management plan and approves or rejects the changes. Key Benefit: The key benefit of this process is that it allows for documented changes within the project to be considered in an integrated fashion while reducing project risk, which often arises from changes made without consideration to the overall project objectives or plans. Inputs 1. Project management plan 2. Work performance reports 3. Change requests 4. Enterprise environmental factors 5. Organizational process assets Tools & Techniques 1. Expert judgment 2. Meetings 3. Change control tools Outputs 1. Approved change requests 2. Change log 3. Project management plan updates 4. Project documents updates
