NEW QUESTION: 1A. Option CB. Option DC. Option AD. Option BAnswer: A

NEW QUESTION: 2A company currently uses Microsoft Active Directory as its identity provider. The company recently subscribed to Oracle Cloud Infrastructure (OCI) to leverage the cloud platform for test and development. As the administrator, you configured the OCI tenancy to be federated with Microsoft Active Directory. Now you need to give access to developers so that they can start creating resources in their OCI accounts.Which step will you perform to make sure you are not duplicating user creation inside of OCI tenancy?**A.** Create a group for developers on OCI and map the group to a similar group in Microsoft Active Directory during the federation process.**B.** Create a group for developers on OCI, export all the developers from Microsoft Active Directory, and then import them into the Identity and Access Management (IAM) group.**C.** Create a single user account in OCI, and then create policies to provide access to developers to this single account.**D.** Create a new user account in OCI for each user, and then create policies to provide access to developers.**Answer: A****Explanation:**ExplanationWhen working with your IdP, your administrator defines groups and assigns each user to one or more groups according to the type of access the user needs. Oracle Cloud Infrastructure also uses the concept of groups (in conjunction with IAM policies) to define the type of access a user has. As part of setting up the relationship with the IdP, your administrator can map each IdP group to a similarly defined IAM group, so that your company can re-use the IdP group definitions when authorizing user access to Oracle Cloud Infrastructure resources.

NEW QUESTION: 3You are developing an application in C#.You need to write a custom event to the Windows application log.You have the following code.**Answer:** Explanation:
