NEW QUESTION: 1 A SysOps Administrator receives reports of an Auto Scaling group failing to scale when the nodes running Amazon Linux in the cluster are constrained by high memory utilization. What should the Administrator do to enable scaling to better adapt to the high memory utilization? **A.** Create a custom script that pipes memory utilization to Amazon S3, then, scale with an AWS Lambda- powered event **B.** Deploy an Application Load Balancer to more evenly distribute traffic among nodes **C.** Increase the minimum size of the cluster to meet memory and application load demands **D.** Install the Amazon CloudWatch memory monitoring scripts, and create a custom metric based on the script's results **Answer: B**

NEW QUESTION: 2 You cannot delete a product that is used on an opportunity **A.** False **B.** True **Answer: B**

NEW QUESTION: 3 The serial sevens test is often used to determine delirium and dementia. This test aids in assessing which of the following? **A.** Judgment **B.** Memory **C.** Ability to focus and concentrate thoughts **D.** Abstract thinking **Answer: C** **Explanation:** (A) This answer is incorrect. The test measures the abilities to concentrate and calculate. The use of proverbs is the most common way to test abstraction. (B) This answer is incorrect. The serial sevens test is a common test of calculation ability. It is difficult for the demented or delirious client to perform. (C) This answer is incorrect. The test for judgment should predict whether the individual will behave in a socially accepted manner. (D) This answer is incorrect. In testing memory, the nurse would attempt to get the client either to recall recent events or to think about past events.

NEW QUESTION: 4 A network engineer must set the load balance method on an existing port channel. Which action must be done to apply a new load balancing method? **A.** Adjust the switch SDM back to "default" **B.** Upgrade the PFC to support the latest load balancing methods. **C.** Ensure that IP CEF is enabled globally to support all load balancing methods. **D.** Configure the new load balancing method using port-channel load-balance. **Answer: D** **Explanation:** EtherChannel balances the traffic load across the links in a channel through the reduction of part of the binary pattern that the addresses in the frame form to a numerical value that selects one of the links in the channel. EtherChannel load balancing can use MAC addresses or IP

addresses, source or destination addresses, or both source and destination addresses. The mode applies to all EtherChannels that are configured on the switch. You configure the load balancing and forwarding method with use of the port-channel load-balance {dst-ip | dst-mac | src-dst-ip | src-dst-mac | src-ip | src-mac} global configuration command.
