It is well known that Web-Development-Applications real exam is high-quality and difficult among most certification exam, CertifiationDone offers 30% discount on Web-Development-Applications WGU exam preparation questions.

You need to be in the high spirits to get the working properly done for the latest Web-Development-Applications video training, And our Web-Development-Applications learning guide really wants to be your long-term partner.

You must not be confused about selecting some authentic website as we are offering an

authentic Photoexperienceacademy Web-Development-Applications exam questions in pdf and testing engine for your assistance.

With all advantageous features introduced on the website, you can get the first expression that our Web-Development-Applications practice questions are the best, If you have any questions about the Web-Development-Applications exam dumps, just contact us.

Free PDF Quiz 2024 WGU Reliable Web-Development-Applications: WGU Web Development Applications Test Centres

We can always get one-hand information resource, Don't panic, stay calm, and be confident, You will enjoy learning on our Web-Development-Applications exam questions for its wonderful and latest design with the latest technologies applied.

Our Courses and Certificates test questions and answers are the best learning materials for preparing their certification, Get Instant Access to Web-Development-Applications Exam and 1,200+ More.

Do this, therefore, our Web-Development-Applications study materials has become the industry well-known brands, but even so, we have never stopped the pace of progress, we have been constantly updated the Web-Development-Applications study materials.

We not only in the pre-sale for users provide free demo, when buy the user can choose in we provide in the three versions, at the same time, our Web-Development-Applications study materials also provides 24-hour after-sales service, even if you are failing the exam, don't pass the exam, the user **Test Web-Development-Applications Centres** may also demand a full refund with purchase vouchers, make the best use of the test data, not for the user to increase the economic burden.

For candidates who are going to buy Web-Development-Applications training materials online, they may pay much attention to the quality of the exam dumps, since it will depend on whether they may pass the exam or not.

If you have any difficulty in choosing the correct Web-Development-Applications preparation materials, here comes a piece of good news for you.

NEW QUESTION: 1A. Option D**B.** Option A**C.** Option B**D.** Option C**Answer: D**

NEW QUESTION: 2HOTSPOTYour network contains an Active Directory domain named contoso.com. The domain contains three member servers named Server1, Server2, and Server3. All servers run Windows Server 2012 R2 and have the Windows Server Update Services (WSUS) server role installed.Server1 and Server2 are configured as replica servers that use Server3 as an upstream server.You remove Servers from the network.You need to ensure that WSUS on Server2 retrieves updates from Server1. The solution must ensure that Server1 and Server2 have the latest updates from Microsoft.Which command should you run on each server? To answer, select the appropriate command to run on each server in the answer area.
Answer: Explanation:Explanation:Set-WsusServerSynchronization-SyncFromMU [-UpdateServer<IUpdateServer>] [-Confirm] [-WhatIf][<CommonParameters>] Set-WsusServerSynchronization-UssServerName<String> [-PortNumber<Int32>] [-Replica] [-UpdateServer<IUpdateServer>] [-UseSsl] [-Confirm] [-WhatIf] [<CommonParameters>] The Set-WsusServerSynchronizationcmdlet sets whether the Windows Server Update Services (WSUS) server synchronizes from Microsoft Update or an upstream server. This cmdlet allows the user to specify settings such as the upstream server name, the port number, and whether or

not to use Secure Sockets Layer (SSL).References:http: //technet. microsoft. com/en-us/library/hh826163. aspxhttp: //technet. microsoft. com/en-us/library/cc708480%28v=ws. 10%29. aspx

NEW QUESTION: 3 Case Study: 5 - Dress4winCompany OverviewDress4win is a web-based company that helps their users organize and manage their personal wardrobe using a website and mobile application. The company also cultivates an active social network that connects their users with designers and retailers. They monetize their services through advertising, e-commerce, referrals, and a freemium app model. The application has grown from a few servers in the founder's garage to several hundred servers and appliances in a collocated data center. However, the capacity of their infrastructure is now insufficient for the application's rapid growth. Because of this growth and the company's desire to innovate faster.Dress4Win is committing to a full migration to a public cloud.Solution ConceptFor the first phase of their migration to the cloud, Dress4win is moving their development and test environments. They are also building a disaster recovery site, because their current infrastructure is at a single location. They are not sure which components of their architecture they can migrate as is and which components they need to change before migrating them.Existing Technical Environment The Dress4win application is served out of a single data center location. All servers run Ubuntu LTS v16.04.Databases:MySQL. 1 server for user data, inventory, static data:* - MySQL 5.8- 8 core CPUs- 128 GB of RAM- 2x 5 TB HDD (RAID 1)Redis 3 server cluster for metadata, social graph, caching. Each server is:* - Redis 3.2- 4 core CPUs- 32GB of RAMCompute:40 Web Application servers providing micro-services based APIs and static content.* - Tomcat - Java- Nginx- 4 core CPUs- 32 GB of RAM20 Apache Hadoop/Spark servers:* - Data analysis- Real-time trending calculations- 8 core CPUS- 128 GB of RAM- 4x 5 TB HDD (RAID 1)3 RabbitMQ servers for messaging, social notifications, and events:* - 8 core CPUs- 32GB of RAMMiscellaneous servers:* - Jenkins, monitoring, bastion hosts, security scanners- 8 core CPUs- 32GB of RAMStorage appliances:iSCSI for VM hosts* Fiber channel SAN - MySQL databases* - 1 PB total storage; 400 TB availableNAS - image storage, logs, backups* - 100 TB total storage; 35 TB availableBusiness RequirementsBuild a reliable and reproducible environment with scaled parity of production.* Improve security by defining and adhering to a set of security and Identity and Access* Management (IAM) best practices for cloud.Improve business agility and speed of innovation through rapid provisioning of new resources.* Analyze and optimize architecture for performance in the cloud.* Technical RequirementsEasily create non-production environment in the cloud.* Implement an automation framework for provisioning resources in cloud.* Implement a continuous deployment process for deploying applications to the on-premises* datacenter or cloud.Support failover of the production environment to cloud during an emergency.* Encrypt data on the wire and at rest.* Support multiple private connections between the production data center and cloud* environment.Executive StatementOur investors are concerned about our ability to scale and contain costs with our current infrastructure. They are also concerned that a competitor could use a public cloud platform to offset their up-front investment and free them to focus on developing better features. Our traffic patterns are highest in the mornings and weekend evenings; during other times, 80% of our capacity is sitting idle.Our capital expenditure is now exceeding our quarterly projections. Migrating to the cloud will likely cause an initial increase in spending, but we expect to fully transition before our next hardware refresh cycle. Our total cost of ownership (TCO) analysis over the next 5 years for a public cloud strategy achieves a cost reduction between 30% and 50% over our current model.For this question, refer to the Dress4Win case study. You want to ensure that your on-premises architecture meets business requirements before you migrate your solution.What change in the on-premises architecture should you make?**A.** Replace RabbitMQ with Google Pub/Sub.**B.** Containerize the micro services and host them in Google Kubernetes Engine.**C.** Downgrade MySQL to v5.7, which is supported by Cloud SQL for MySQL. **D.** Resize compute resources to match predefined Compute Engine machine types.**Answer: D**
