This kind of service shows our self-confidence and actual strength about DS0-001 study materials in our company, If you pass DS0-001 with a good mark and want to purchase other CompTIA exams review materials we will give you discount.

NEW QUESTION: 1 Refer to the exhibit. A technician pastes the configurations in the exhibit into the two new routers shown. Otherwise, the routers are configured with their default configurations. A ping from Host1 to Host2 fails, but the technician is able to ping the S0/0 interface of R2 from Host1. The configurations of the hosts have been verified as correct. What is the cause of the problem?
A. The interfaces on R2 are not configured properly.
B. The ip subnet-zero command must be configured on both routers.
C. The serial cable on R1 needs to be replaced.
D. R1 has no route to the 192.168.1.128 network.
E. The IP addressing scheme has overlapping subnetworks.
Answer: D
Explanation: Whenever a node needs to send data to another node on a network, it must first know where to send it. If the node cannot directly connect to the destination node, it has to send it via other nodes along a proper route to the destination node. A remote network is a network that can only be reached by sending the packet to another router. Remote networks are added to the routing table using either a dynamic routing protocol or by configuring static routes. Static routes are routes to networks that a network administrator manually configured. So R should have static route for the 192.168.1.128.

NEW QUESTION: 2 What is the role of the DB2 task center?
A. The task center does not exist in DB2.
B. The DB2 task center displays all tasks that were completed to create your DB2 database. It allows you to make changes to the DB2 metadata only.
C. The DB2 task center is an automated feature in the DB2 product that monitors the health of your DB2 database and executes tasks that maintain the health of your database. When they have been executed, tasks are listed for your review.
D. The DB2 task center is used to run or schedule tasks and to notify people about the status of completed tasks.
Answer: D

NEW QUESTION: 3

CloudFormationでJSONテンプレートを使用してスタックを設定し、それらを少しよく理解して試してみてください。

5つまたは6つほどセットアップしましたが、これらのスタックに課金されているのではないかと思います。始めました。スタックリソースに関するAWSの請求ポリシーとは何ですか？

A. スタックリソースがトラフィックを使用していない場合、スタックリソースに対して課金されません。
B.

スタックリソースに対して、それらが動作していた時間に対して課金されます（ただし、30分以内にスタックを削除した場合は課金されません）

C. 動作していた時間のスタックリソースに対して課金されます（60分以内にスタックを削除した場合は課金されません）
D.

スタックリソースは、それらが動作していた時間に対して課金されます（スタックをすぐに削除した場合でも）
Answer: D
Explanation: Explanation A stack is a collection of AWS resources that

you can manage as a single unit. In other words, you can create, update, or delete a collection of resources by creating, updating, or deleting stacks. All the resources in a stack are defined by the stack's AWS CloudFormation template. A stack, for instance, can include all the resources required to run a web application, such as a web server, a database, and networking rules. If you no longer require that web application, you can simply delete the stack, and all of its related resources are deleted. You are charged for the stack resources for the time they were operating (even if you deleted the stack right away).

<http://docs.aws.amazon.com/AWSCloudFormation/latest/UserGuide/stacks.html>
