NEW QUESTION: 1A. Option CB. Option AC. Option DD. Option B
Answer: A
Explanation: DHCP guard setting This setting stops the virtual machine from making DHCP offers over this network interface. To be clear this does not affect the ability to receive a DHCP offer (i.e. if you need to use DHCP to acquire an IP address that will work) it only blocks the ability for the virtual machine to act as a DHCP server.

NEW QUESTION: 2 At the completion of a system development project, a postproject review should include which of the following?
A. Verifying the controls in the delivered system are working
B. Identifying lessons learned that may be applicable to future projects
C. Assessing risks that may lead to downtime after the production release
D. Ensuring that test data are deleted
Answer: B
Explanation: A project team has something to learn from each and every project. As risk assessment is a key issue for project management, it is important for the organization to accumulate lessons learned and integrate them into future projects. An assessment of potential downtime should be made with the operations group and other specialists before implementing a system. Verifying that controls are working should be covered during the acceptance test phase and possibly, again, in the postimplementation review. Test data should be retained for future regression testing.
