NEW QUESTION: 1

技術者は、ユーザーのモバイルデバイスのネットワーク速度の問題をトラブルシューティングするために、ユーザーの携帯電話プロバイダーに電話する必要があります。技術者がトラブルシューティングしているテクノロジーは次のうちどれですか？**A.** 近距離無線通信**B.** Z-wave**C.** 長期的な進化**D.** 無線周波数ID**Answer: C**

NEW QUESTION: 2 When a middle-age woman says to the nurse, "I'm really worried about menopause. When my mom went through it, she got really depressed." The nurse's best response is:**A.** "Menopause is a normal developmental process."**B.** "When women experience depression during menopause it is usually because of social stresses."**C.** "It is a myth that women get depressed because of menopause."**D.** "It sounds like you are worried that you might become depressed during menopause."**Answer: D****Explanation:** Explanation/Reference: Explanation: Choice 3 not only acknowledges the client's fear but invites more disclosure and discussion. Reflective listening is very therapeutic and in this case acknowledges the woman's unspoken fear that she might become depressed like her mother. When her fears have been acknowledged and she feels that the nurse understands, she will be more open to the teaching or interventions to follow. It is a myth that menopause causes depression, but to say that to this client does not acknowledge the fear she shared with the nurse and gives the impression the nurse doesn't care about her concern. It closes down communication. It is also true that menopause is a normal developmental process. This can certainly be used in teaching but not to address her immediate concern; the client might feel the nurse doesn't think her concern is appropriate because menopause is normal. If women experience depression during menopause, it is usually due to social stresses such as loss of loved ones, loss of roles, caregiver demands, and physical problems. Choice 4 is true but is a nontherapeutic response in this situation. Health Promotion and Maintenance

NEW QUESTION: 3 An analyst connects to a company web conference hosted on [www.webconference.com/meetingID#01234](#) and observes that numerous guests have been allowed to join, without providing identifying information. The topics covered during the web conference are considered proprietary to the company. Which of the following security concerns does the analyst present to management?**A.** Guest users could present a risk to the integrity of the company's information.**B.** Unauthenticated users could present a risk to the

confidentiality of the company's information. **C.** Authenticated users could sponsor guest access that was previously approved by management. **D.** Meeting owners could sponsor guest access if they have passed a background check. **Answer: B** Explanation: The issue at stake in this question is confidentiality of information. Topics covered during the web conference are considered proprietary and should remain confidential, which means it should not be shared with unauthorized users.

NEW QUESTION: 4 You have 10 Hyper-V hosts that run Windows Server 2016. Each Hyper-V host has eight virtual machines that run a distributed web application named App1. You plan to implement a Software Load Balancing (SLB) solution for client access to App1. You deploy two new virtual machines named SLB1 and SLB2. You need to install the required components on the Hyper-V hosts and the new servers for the planned implementation. Which components should you install? Select the Appropriate in selection area. **Answer:** Explanation: Explanation Component to install on SLB1 and SLB2: SLB Multiplexer (MUX) Component to install on each Hyper-V host: SLB Host Agent

https://blogs.technet.microsoft.com/tip_of_the_day/2016/06/28/tip-of-the-day-demystifying-software-defined-networking/ <https://technet.microsoft.com/en-us/library/mt632286.aspx> SLB Host Agent - When you deploy SLB, you must use System Center, Windows PowerShell, or another management application to deploy the SLB Host Agent on every Hyper-V host computer. You can install the SLB Host Agent on all versions of Windows Server 2016 that provide Hyper-V support, including Nano Server. SLB MUX - Part of the Software Load Balancer (SLB on Windows Server 2016, the SLB MUX processes inbound network traffic and maps VIPs (virtual IPs) to DIPs (datacenter IPs), then forwards the traffic to the correct DIP. Each MUX also uses BGP to publish VIP routes to edge routers. BGP Keep Alive notifies MUXes when a MUX fails, which allows active MUXes to redistribute the load in case of a MUX failure - essentially providing load balancing for the load balancers.
