NEW QUESTION: 2 HOTSPOT Your network contains an Active Directory domain named contoso.com. The domain contains a DNS server named Server1. Server1 is configured to resolve single-label names for DNS clients. You need to view the number of queries for single-label names that are resolved by Server1. What command should you run? To answer, select the appropriate options in the answer area. Hot Area: **Answer:** Explanation: Explanation/Reference: * The Get-DnsServerStatistics cmdlet retrieves statistics of a Domain Name System (DNS) server. If the ZoneName parameter is specified, this cmdlet gets statistics for the zones specified by that parameter. * To help network administrators migrate to DNS for all name resolution, the DNS Server role in Windows Server 2008 (and later) supports a specially named zone, called GlobalNames. By deploying a zone with this name, you can have the static, global records with single-label names, without relying on WINS. These single-label names typically refer to records for important, well-known and widely-used servers-servers that are

already assigned static IP addresses and that are currently managed by IT-administrators using WINS. Reference: Get-DnsServerStatistics; Deploying a GlobalNames Zone

NEW QUESTION: 3 You have a server named Server1 that runs Windows Server 2012. Server1 has the File Server Resource Manager role service installed. Server1 has a folder named Folder1 that is used by the sales department. You need to ensure that an email notification is sent to the sales manager when a File Screening Audit report is generated. What should you configure on Server1?
A. A storage report task
B. A file group
C. A file screen exception
D. A file screen
Answer: A
Explanation: From the Storage Reports Management node, you can generate reports that will help you understand file use on the storage server. You can use the storage reports to monitor disk usage patterns (by file type or user), identify duplicate files and dormant files, track quota usage, and audit file screening. Before you run a File Screen Audit report, in the File Server Resource Manager Options dialog box, on the File Screen Audit tab, verify that the Record file screening activity in the auditing database check box is selected.
