NEW QUESTION: 1You are developing an application to securely transfer data between on-premises file systems and Azure Blob storage. The application stores keys, secrets, and certificates in Azure Key Vault. The application uses the Azure Key Vault APIs. The application must allow recovery of an accidental deletion of the key vault or key vault objects. Key vault objects must be retained for 90 days after deletion. You need to protect the key vault and key vault objects. Which Azure Key Vault feature should you use? To answer, drag the appropriate features to the correct actions. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: ExplanationBox 1: Soft deleteWhen soft-delete is enabled, resources marked as deleted resources are retained for a specified period (90 days by default). The service further provides a mechanism for recovering the deleted object, essentially undoing the deletion.Box 2: Purge protectionPurge protection is an optional Key Vault behavior and is not enabled by default. Purge protection can only be enabled once soft-delete is enabled. When purge protection is on, a vault or an object in the deleted state cannot be purged until the retention period has passed. Soft-deleted vaults and objects can still be recovered, ensuring that the retention policy will be followed. Reference: <https://docs.microsoft.com/en-us/azure/key-vault/general/soft-delete-overview>

NEW QUESTION: 2What is a function of the ESRS Management Utility?**A.** Adds VNX Block system to the distributed monitoring agent**B.** Configures the portal system**C.** Adds and approves SPA and SPB in ServiceLink**D.** Applies the latest call home template to the Management Station**Answer: C**

NEW QUESTION: 3A. Option DB. Option BC. Option AD. Option CAnswer: D

NEW QUESTION: 4On R1, encrypt counters are incrementing. On R2, packets are decrypted, but the encrypt counter is not being incremented. What is the most likely cause of this issue?**A.** incomplete IPsec SA establishment**B.** a routing problem on R2**C.** crypto engine failure on R2**D.** a routing problem on R1**E.** IPsec rekeying is occurring**Answer: B**
