NEW QUESTION: 1 Which of the following questions is less likely to help in assessing physical and environmental protection?
A. Are entry codes changed periodically?
B. Are appropriate fire suppression and prevention devices installed and working?
C. Is physical access to data transmission lines controlled?
D. Are there processes to ensure that unauthorized individuals cannot read, copy, alter, or steal printed or electronic information?
Answer: D
Explanation: Physical security and environmental security are part of operational controls, and are measures taken to protect systems, buildings, and related supporting infrastructures against threats associated with their physical environment. All the questions above are useful in assessing physical and environmental protection except for the one regarding processes that ensuring that unauthorized individuals cannot access information, which is more a production control. NEW QUESTION: 2 CORRECT TEXT Most statistical simulations of budgets, schedules, and resource allocations use which one of the following approaches?
A. PERT
B. Present value analysis
C. Decision-tree analysis
D. Monte Carlo analysis
Answer: D
Explanation: Simulations are typically performed using Monte Carlo in which a project model is computed many times with the input values chosen at random for each iteration from the probability distribution of these variables. Monte Carlo analysis supports various statistical distributions (normal, triangular, beta, uniform, etc.) used in estimating budgets, schedules, and resource allocations.
