In contrast, being venerated for high quality and accuracy rate, our ARC-801 practice materials received high reputation for their efficiency and accuracy rate originating from Exam ARC-801 Forum your interests, and the whole review process may be smoother than you have imagined before.

IT certification is one of the means of competition [Free 300-410 Updates](#) in the IT industry, With so many years' concentrated development we are more and more mature and stable, there are more than 9600 candidates choosing our Salesforce ARC-801 dumps VCE file.

There are some loopholes or systemic problems in the use of a product, which New ARC-801 Exam Testking is why a lot of online products are maintained for a very late period, Therefore, Photoexperienceacademy also keeps updating test questions and answers.

NEW QUESTION: 1 Which two statements describe the Cisco UCS Manager full state type of backup? (Choose two.)
A. It creates an XML file.
B. The file created cannot be used to restore the system during disaster recovery.
C. It creates binary file.
D. The file created can only be used to restore a system that is running the same version as the system from which the backup file was exported.
E. The file created can be used for an import.
Answer: C,D

NEW QUESTION: 2 Which statement about Cisco ACS authentication and authorization is true?
A. ACS uses TACACS to proxy other authentication servers.
B. ACS can use only one authorization profile to allow or deny requests.
C. ACS servers can be clustered to provide scalability.
D. ACS can query multiple Active Directory domains.
Answer: C
Explanation: Explanation ACS can join one AD domain. If your Active Directory structure has multi-domain forest or is divided into multiple forests, ensure that trust relationships exist between the domain to which ACS is connected and the other domains that have user and machine information to which you need access. So B is not correct. Source: http://www.cisco.com/c/en/us/td/docs/net_mgmt/cisco_secure_access_control_system/5-8/ACS-ADIntegration/guide/Active_Directory_Integration_in_ACS_5-8.pdf + You can define multiple authorization profiles as a network access policy result. In this way, you maintain a smaller number of authorization profiles, because you can use the authorization profiles in combination as rule results, rather than maintaining all the combinations themselves in individual profiles. So D. is not correct + ACS 5.1 can function both as a RADIUS and RADIUS proxy server. When it acts as a proxy server, ACS receives authentication and accounting requests from the NAS and forwards the requests to the external RADIUS server. So C. is not correct. Source: http://www.cisco.com/c/en/us/td/docs/net_mgmt/cisco_secure_access_control_system/5-1/user/guide/acsuserguide/policy_mod.html

NEW QUESTION: 3 Which two prerequisites are needed for performing workload capture and replay? (Choose two.)
A. running the database in shared server mode
B. The database on which the workload is replayed has to be a restore of the original database to a specific SCN.
C. Close all sessions performing queries using database links.
D. setting up the directory to capture the workload
Answer: B,D
