NEW QUESTION: 1 A database administrator would like to start encrypting database exports stored on the SAN, but the storage administrator warns that this may drastically increase the amount of disk space used by the exports. Which of the following explains the reason for the increase in disk space usage?
A. Deduplication is not compatible with encryption
B. Encrypted files are much larger than unencrypted files
C. The exports are being stored on smaller SAS drives
D. The SAN already uses encryption at rest
Answer: B
Explanation: Encryption adds overhead to the data which results in an increase in file size. This overhead is attached to each file and could include the encryption/decryption key, data recovery files and data decryption field in file header. As a result, requires increased storage space.
