Above all, CFPE valid exam dumps will live up to your expectations and help you achieve your goals.

NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2. Server1 has the Hyper-V server role installed. Server1 has a virtual switch named RDS Virtual. You replace all of the network adapters on Server1 with new network adapters that support single-root I/O virtualization (SR-IOV). You need to enable SR-IOV for all of the virtual machines on Server1. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) **A.** On each virtual machine, modify the Advanced Features settings of the network adapter. **B.** Delete, and then recreate the RDS Virtual virtual switch. **C.** On each virtual machine, modify the Hardware Acceleration settings of the network adapter. **D.** Modify the settings of the RDS Virtual virtual switch. **E.** On each virtual machine, modify the BIOS settings. **Answer: B,C**
Explanation: The first step when allowing a virtual machine to have connectivity to a physical network is to create an external virtual switch using Virtual Switch Manager in Hyper-V Manager. The additional step that is necessary when using SR-IOV is to ensure the checkbox is checked when the virtual switch is being created. It is not possible to change a "non SR-IOV mode" external virtual switch into an "SR-IOV mode" switch. The choice must be made a switch creation time. Thus you should first delete the existing virtual switch and then recreate it. **E:** Once a virtual switch has been created, the next step is to configure a virtual machine. SR-IOV in Windows Server "8" is supported on x64 editions of Windows "8" as a guest operating system (as in Windows "8" Server, and Windows "8" client x64, but not x86 client). We have rearranged the settings for a virtual machine to introduce sub-nodes under a network adapter, one of which is the hardware acceleration node. At the bottom is a checkbox to enable SR-IOV.

NEW QUESTION: 2You have a Microsoft 365 E5 subscription and 5,000 users. You create several alert policies that are triggered every time activities match rules. You need to create an alert policy that is triggered when the volume of matched activities becomes unusual. What should you do first? **A.** Deploy a Microsoft Office 365 add-in to all the users. **B.** Enable Microsoft Office

365 auditing.**C.** Enable MicrosoftOffice 365 analytics.**D.** Enable Microsoft Office 365 Cloud App Security.**Answer: C**

NEW QUESTION: 3You are working with the default Opportunity form In Microsoft Dynamics 365.Your sales manager has asked all sales staff to maintain best practices when managing sales and to enter as much information as possible.You need to be able to add additional records and activities to the Opportunity without leaving the form.What are two types of records you can add from within the Opportunity form? Each correct answer presents a complete solution.**A.** Stakeholders**B.** Invoices**C.** Products**D.** Credit Notes / Adjustment Notes
Answer: A,C
