Not only will you be able to pass any Juniper Certification test, but it gets better!

NEW QUESTION: 1You administer the Office 365 environment for a company that has offices around the world. All of the offices use the same Office 365 tenant.You need to ensure that all users can access the services that are available in their regions.Which setting or service should you update?**A.** Rights management**B.** Service usage address**C.** User location settings**D.** User licenses**Answer: C****Explanation:**The User Location settings will allow you to set sign-in status and user locations for all the users that are on your network notwithstanding the physical location where they find themselves.**References:**

<http://blogs.perficient.com/microsoft/2014/11/office-365-assign-licensing-user-location-via-active-directory/>

NEW QUESTION: 2A technician is on the phone with a software vendor and needs to fix an issue. The vendor asks specific information regarding a patient's file. Which of the following describes what should happen NEXT?**A.** The technician should give the vendor the information needed if a signed BAA is in place.**B.** The technician should have the PM give the information to the vendor.**C.** The technician should have the last MD who worked on this file grant permission for the vendor to access the information.**D.** The technician should not give the vendor any specific data since the vendor already has access to needed data.**Answer: D**

NEW QUESTION: 3What is Kerberos?**A.** A three-headed dog from the egyptian mythology.**B.** A security model.**C.** A remote authentication dial in user server.**D.** A trusted third-party authentication protocol.**Answer: D****Explanation:**Explanation/Reference:Is correct because that is exactly what Kerberos is.The following answers are incorrect:A three-headed dog from Egyptian mythology. Is incorrect because we are dealing with Information Security and not the Egyptian mythology but the Greek Mythology.A security model. Is incorrect because Kerberos is an authentication protocol and not just a security model.A remote authentication dial in user server. Is incorrect because Kerberos is not a remote authentication dial in user server that would be called RADIUS.
