NEW QUESTION: 1A company is in the process of outsourcing its customer relationship management system to a cloud provider. It will host the entire organization's customer database. The database will be accessed by both the company's users and its customers. The procurement department has asked what security activities must be performed for the deal to proceed. Which of the following are the MOST appropriate security activities to be performed as part of due diligence? (Select TWO).**A.** Penetration testing of the solution to ensure that the customer data is well protected.**B.** Code review of the solution to ensure that there are no back doors located in the software.**C.** Review of the organizations security policies, procedures and relevant hosting certifications.**D.** Security clauses are implemented into the contract such as the right to audit.**E.** Physical penetration test of the datacenter to ensure there are appropriate controls.**Answer: C,D**Explanation:Due diligence refers to an investigation of a business or person prior to signing a contract. Due diligence verifies information supplied by vendors with regards to processes, financials, experience, and performance. Due diligence should verify the data supplied in the RFP and concentrate on the following:Company profile, strategy, mission, and reputationFinancial status, including reviews of audited financial statementsCustomer references, preferably from companies that have outsourced similar processesManagement qualifications, including criminal background checksProcess expertise, methodology, and effectivenessQuality initiatives and certificationsTechnology, infrastructure stability, and applicationsSecurity and audit controlsLegal and regulatory compliance, including any outstanding complaints or litigationUse of subcontractorsInsuranceDisaster recovery and business continuity policiesC and D form part of Security and audit controls.Incorrect Answers: A: A Physical Penetration Test recognizes the security weaknesses and strengths of the physical security.It will, therefore, not form part of due diligence because due diligence verifies information supplied by vendors with regards to processes, financials, experience, and performance.B: A penetration test is a software attack on a computer system that looks for security weaknesses. It will, therefore, not form part of due diligence because due diligence verifies information supplied by vendors with regards to processes, financials, experience, and performance.E: A security code review is an examination of an application that is designed to

identify and assess threats to an organization. It will, therefore, not form part of due diligence because due diligence verifies information supplied by vendors with regards to processes, financials, experience, and performance. References:
