**NEW QUESTION: 1** A company has a VMware host installed with FC HBAs that is connected to a Dell EMC Unity XT storage array. A 500 GB LUN is provisioned to this host from the Unity array and is in production. The VMware administrator has configured a new vSwitch with the NICs on the server intended for iSCSI traffic. The storage administrator is asked to configure software iSCSI and provision a new 1 TB LUN from the storage array via iSCSI. What is a consideration when satisfying this request?  
**A.** Any single host should connect to any single array using one protocol only  
**B.** The iSCSI configuration must use all the NIC connections to the host  
**C.** A connection must be established between the host iSCSI initiators and Unity iSCSI targets before provisioning the new LUN  
**D.** Two iSCSI target interfaces must be configured with IP addresses from separate subnets  
**Answer: D**

**NEW QUESTION: 2** In order to manually register a host, which type of information is required?  
**A.** IP address, HBA type, and host array  
**B.** IP address, host name, and host WWN  
**C.** Host name, initiator type, and SP port physical location  
**D.** Host name, array CommPath, and storage group  
**Answer: B**

**NEW QUESTION: 3** Refer to the exhibit. In the communication between host 1 and host 2 over the point-to-point WAN, which protocol or technology is represented by dashed line A?  
**A.** IEEE 802.3  
**B.** T1  
**C.** PPP  
**D.** IP  
**Answer: D**  
**Explanation:** This question is to examine knowledge point about WAN connectivity. The communication between two host computers is based on network layer; therefore their communication is actually IP communication. Generally, IEEE 802.2 refers to Ethernet. T1/E1 represents two data transmission speed standards. T1 is a North American Standard, which support 1.544Mbps dedicated circuit telephone data transmission. It is made of 24 autonomous channels and transmission speed of each one is 64kpbs, which can use simultaneously to transmit voice and data. PPP(Point-to-Point Protocol) is a link layer protocol which is designed simple link circuit such as transmit data between coequal cells. This link circuit supplies duplex operation and transmit data packet in order. The purpose of the design is mainly about creating point-to-point connection through dial-up or autonomous channels to transmit data, making it the common solution of connection between different host computers, network bridges and routers.
