Of course, our C1000-138 real questions can give users not only valuable experience about the exam, but also the latest information about the exam.

NEW QUESTION: 1A. Option CB. Option DC. Option BD. Option AAnswer: D

NEW QUESTION: 2Consider the following requirement:Whether or not an operator is allowed to view accounts in a PRPC-based credit card application depends on the grade of the employee and the credit limit of the account. The grade, which is an attribute in the company's LDAP directory, is a numeric scale ranging from 1-10. The requirement states that employees may open accounts that have a Credit Limit less than $(10000 * (10/Grade))$. For example, Senior Vice Presidents (Grade = 1) can open accounts with less than a \$100,000 limit, and entry-level employees (Grade = 10) can open accounts with less than a \$10,000 limit.Which of the following is the best approach to meet this requirement? (Choose One)**A.** The operator's Access Group references an Access Role. The "open instances" setting for the Access of Role to Object (ARO) references an Access When rule that reads a MaxAmountToOpen property. This property is populated by a Declare Expression that uses the "EmployeeGrade" property, which is populated by an Authentication Activity.**B.** The operators reference an Access Group that references a Role, which is referenced by an Access of Role to Object (ARO) rule. The "open instances" setting for the ARO references an Access When rule that reads a MaxAmountToOpen property. This property is calculated within the Authentication Activity.**C.** The operators reference a Work Group that references a Workbasket. The Workbasket references a Role, which is referenced by an Access of Role to Object (ARO) rule. The "open instances" setting for the ARO references an Access When rule that reads a MaxAmountToOpen property. This property is populated by a Declare Expression that uses the "EmployeeGrade" property, which is populated by an Authentication Activity.**D.** The operators reference an Access Group that references a Role, which is referenced by an Access of Role to Object (ARO) rule. The privilege, CanView, on the ARO references an Access When rule that reads a MaxAmountToOpen property. This property is populated by a Declare Expression that uses the "EmployeeGrade" property, which is populated by an Authentication Activity.**Answer: A**

NEW QUESTION: 3 How should you design the Miller Textiles public folders in a manner that will ensure fault tolerance?
A. Add a second public folder server, and replicate all public folders to this server. Replicate only the public folders that are used at each plant to the exchange server computers at that plant.
B. At headquarters create a two-node cluster server for all public folders. Use affinity to access the public folders from the plants.
C. Add a second public folder server, and replicate all public folders to this server. Replicate all public folders to the exchange server computers at each plant. Disable public folder referrals for the connectors between headquarters and the plants.
D. Replicate each public folder to the exchange server computer at each plant. Disable public folder referrals between the plants and headquarters.
Answer: A
Explanation: They tell us the manager responsible for the e-mail environment wants to meet the following objectives.
* Decrease WAN traffic caused by people accessing frequently used public folders that are homed or Server at headquarters.
The best solution is B. In this way they get a better performance in headquarters, also they just need to replicate the public folder that each plant use, after replication the Wan traffic will decrease
