We believe that our study materials will be a good choice for you.

**NEW QUESTION: 1**A process routes loan requests to a specific loan officer based on the type of loan.\* If the loan is a mortgage, it is routed to Adam Ross.\* If the loan is for an automobile, it is routed to Julia Samuels.\* If the loan is an equity line, the case is routed to Don Smith.How do you configure a router to ensure that case advances to the correct loan officer?**A.** Route the case to a work queue using a skilled router.**B.** Route the case to a work queue using a When condition.**C.** Route the case to a worklist using a skilled router.**D.** Route the case to a worklist using a When condition.**Answer: D**

**NEW QUESTION: 2**This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studied might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changed before you move to the next section of the exam. After you begin a new section, you cannot return to this section.To start the case studyTo display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. Note that the information displayed on the All information tab is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.Overview  
General OverviewContoso, Ltd. is a manufacturing company that has 500 employees. The company has sales, marketing, research, and accounting departments.Contoso recently acquired another company named ADatum Corporation, which has 100 users with mailboxes

hosted on a third-party, non-Microsoft Exchange Server platform. Physical Locations Contoso has two offices. One office is located in New York and the other office is located in London. The offices connect to each other by using a WAN link. Each office also connects directly to the Internet. Existing Environment Active Directory The network contains an Active Directory forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2008 R2. Each office contains five domain controllers. Each office is configured as an Active Directory site. Office 365 Subscription Contoso recently purchased an Office 365 subscription and began using Exchange Online, SharePoint Online, and Skype for Business Online. All Office 365 identities are managed in the cloud. Current Business Model Users in the accounting department have access to Windows by using Remote Desktop Services (RDS). All client applications, including Office, are made available through Remote Desktop sessions. Users in the marketing department frequently change their computer and must reinstall Office. Users in the research department deal with highly sensitive patents; therefore, they do not have access to the Internet from their computer. Problem Statements Contoso identifies the following issues on the network: Users who started using Skype for Business Online for instant messaging report that they receive increased amounts of unsolicited commercial instant messages from a domain named fabrikam.com. A new employee named User1 reports that this name was misspelled when his account was initially created, which has resulted in an incorrect user sign-in SIP address in Skype for Business Online. Mobile Device Mailbox Policies You have the following mobile device mailbox policies in Office 365. Requirements Business goals Contoso plans to upgrade to Office 2016 during the next six months. As much as possible, Contoso plans to minimize the costs associated with purchasing hardware and software. Planned Changes Contoso plans to implement the following changes on the network: The ADatum mailboxes will be migrated to the Exchange Online tenant of Contoso by using the IMAP migration method. The executive management at Contoso wants to prevent users from accessing their Exchange Online mailbox by using Outlook on the web. As a part of the ADatum acquisition, some managers in the New York office will receive a new primary SMTP address. The current primary SMTP addresses of the managers must be demoted to secondary addresses. The manager of a user named User2 in the accounting department requests a new email address of [\[email#160;protected\]](#) for the user. All new email messages sent by User2 must come from the new address. User2 must still be able to receive messages by using the current address of [\[email#160;protected\]](#). Technical Requirements Contoso identifies the following technical requirements: The amount of time required to install Office on the marketing department computers must be minimized. The computers of the users in the sales department must have only the 64-bit version of Office 365 ProPlus installed. All Exchange Online mailbox data must be retained for 18 months (540 days) and then moved to a user's archive mailbox. The legal department requests that only items in the mailbox of a user named User5 that were sent or received between July and November of last year be preserved for 540 days. The legal department requests that all mailbox items in the organization that have the keyword ProjectX be placed on hold for 180 days from the time they were received or created. If an In-Place Hold is configured for a user, the For compliance, turn off non-archived features Skype for Business Online option must be enabled. Users must only be notified that these features will be disabled temporarily while the In-Place Hold is in effect. Contoso plans to introduce a new mobile device mailbox policy by running the New-MobileDeviceMailboxPolicy-Name "Unrestricted"-PasswordEnabled \$true -AlphanumericPasswordRequired \$true -PasswordRecoveryEnabled \$true -IsDefault \$true -AttachmentsEnabled \$true -AllowStorageCard \$true command. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You need to modify the existing environment to meet the technical requirement for Outlook on the web. Solution: You run the Set-Mailbox command. Does this meet the goal? **A. No** **B. Yes** **Answer: A** Explanation: Explanation/Reference: Explanation: The Set-CASMailbox command, not the Set-Mailbox command, must be used to disable Outlook Web App. This example disables Outlook Web App for the mailbox of Yan Li.

Set-CASMailbox -Identity "Yan Li" -OWAEnabled \$false From scenario: The executive management at Contoso wants to prevent users from accessing their Exchange Online mailbox by using Outlook on the web. Note: You can use the EAC or the Shell to enable or disable Outlook Web App for a user mailbox. When Outlook Web App is enabled, a user can use Outlook Web App to send and receive email. When Outlook Web App is disabled, the mailbox will continue to receive email messages, and a user can access it to send and receive email by using a MAPI client, such as Microsoft Outlook, or with a POP or IMAP email client, assuming that the mailbox is enabled to support access by those clients.
